

Startup's Purpose & Vision

PURPOSE: To strengthen WHO health systems building block on medical products, vaccines and technologies by improving the blood and blood products supply chain, with a focus on access, processing and distribution.

VISION: A public health system with adequate and safe quantities of blood and blood products that are distributed objectively and consistently to all critical patients in need.

Problem

Kenya suffers from inadequate access and variable distribution of blood for patients suffering from chronic diseases (blood disorder and cancer). Inadequate quantities of blood received by the blood bank are fraught with screening challenges which eventually create bias in distribution to patients.

Solution

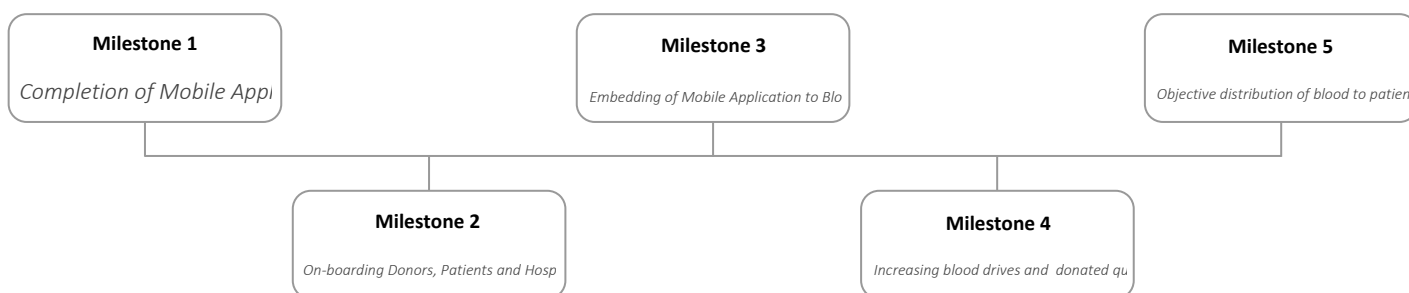

Uhai, in partnership with the Eldoret-Kenya blood bank, is reducing the cost of blood drives to as low as US\$250 and using behavioral incentives to retain more donors. Our AI-enabled application predicts quantities of donated blood, ensures prompt processing and objective distribution to patients.

Business Model

Uhai has been running blood drives in collaboration with the Eldoret blood bank both off-site and on-site. These drives are an opportunity for players in the healthcare and allied industries (such as insurance, banking, sports) to advertise their products. Additionally, we are creating a mobile application for blood donor identification, retention and linking patients in need of blood. This app will offer a subscription service for health education and triaging those in need of regular health screening with on-boarded hospitals.

Startups Milestones

Mention 5 milestones your startup would like to achieve by 2030.

Competitive Landscape

Currently, most blood drives are done manually with the Kenyan government introducing damu.ke which is facility and not donor centric. Other alternatives like Damu Sasa are not addressing the behavioral and rural demographic influences to donations.

SUSTAINABLE DEVELOPMENT GOALS

SDG 3: Good health and Wellbeing - Ensure healthy lives and promote well-being for all at all ages
SDG 10: Reduced Inequalities within and among countries
SDG 17: Strengthen global Partnership for implementing sustainable development goals
